3rd Annual Haykel Hospital Scientific Congress

Featuring

3rd Infection Control Meeting
Pain Management Topics & Workshop
Multidisciplinary Talks

www.hopitalhaykel.com

Welcome note

*Nabil MOHSEN, MD, FAAN
Chairman*

Dear friends and colleagues,

On behalf of the scientific committee of Haykel Hospital, I'm honored and delighted to welcome you to the 3rd Annual Haykel Hospital Scientific Congress that will be held on November 16 - 17, 2018. This would be an unbeatable chance to update your knowledge in many disciplines especially in infection control, pain management and oncology...

Through continuous efforts done in the last few years in many aspects of organization and practice, the Haykel Hospital is now welcoming university medical students and is committed more and more to educational activities and continuing professional development both for practicing physicians and trainees.

The congress will highlight recent updates in various disciplines; in Neurology and Neuropediatrics, Pain Management and Oncology. Hands-on workshops are organized to fill physicians and trainees' needs in order to improve their knowledge and skills. In addition, teaching and education in infection control will have an ample share and representation in the first day of our meeting (CLIN).

The scientific committee has worked hard to deliver a rich program which includes lectures and workshops that will integrate presentations by eminent local and international experts.

We look forward to seeing you. Your presence and participation will make all the difference.

Congress Committee

Nabil MOHSEN, MD,
FAAN, Chairman

Lise ABI RAFEH, MD
