

Breathing+together

Breathing Together – Registered Lebanese NGO

Position: Mobile Medical Unit (MMU) Nurse

Location: Achrafieh – Rmeil (Beirut) with field visits across Lebanon

Contract: Full-time

About Breathing Together

Breathing Together is a registered Lebanese NGO providing accessible, community-based healthcare and psychosocial support to vulnerable populations. Our Mobile Medical Unit delivers primary care and essential medications directly to underserved neighborhoods.

Role Purpose

The MMU Nurse delivers high-quality, patient-centered care in mobile settings, ensures safe medication management, maintains accurate clinical records, and supports smooth day-to-day MMU operations in line with MoPH guidelines and organizational policies.

Key Responsibilities

- **Patient Care**
 - Identify care needs, triage, and implement nursing interventions with a patient-first approach.
 - Prepare patients for examinations and perform routine diagnostics (vitals, point-of-care tests) and procedures (injections, dressings, nebulization).
 - Educate patients and caregivers on treatments, adherence, prevention, and follow-up.
- **Clinical Monitoring & Documentation**
 - Monitor and record vital signs, symptoms, and response to treatment.
 - Document services in patient files and digital tools accurately and on time; support weekly/monthly reporting.
- **Emergency Response**
 - Recognize and manage medical emergencies per BLS/ACLS protocols; stabilize and coordinate referrals/transport when needed.
- **Medication & Stock Management**
 - Prepare monthly medication refills for registered beneficiaries in coordination with the medical officer/pharmacist.
 - Maintain MMU medicine, consumables, and equipment stock (FIFO, temperature control, expiries, counts); request replenishment proactively.

- **Quality, Compliance & IPC**

- Follow national care standards, MoPH guidance, NGO SOPs, and safeguarding policies.
- Uphold infection prevention and control (IPC), waste segregation, and cold-chain requirements.
- Participate in case discussions, audits, and continuous quality improvement.

- **Operations & Teamwork**

- Support daily MMU setup/breakdown, patient flow, and outreach activities.
- Coordinate with the physician, pharmacist, data officer, driver, and social workers; perform other tasks assigned by management to ensure smooth service delivery.

Qualifications

- Registered Nurse (RN) with a valid license from the **Order of Nurses in Lebanon**.
- **Minimum 5 years** of nursing experience; community health, primary care, or mobile/field work is a strong asset.
- Current **BLS** (ACLS preferred).
- Proven experience with medication administration and safe injection practices.
- Solid clinical documentation skills (paper and basic digital tools).

Core Competencies

- Patient-centered communication in **Arabic and English** (French is a plus).
- Strong triage, time management, and problem-solving under field conditions.
- Reliability, discretion, and respect for confidentiality and dignity of beneficiaries.
- Commitment to **Safeguarding, PSEA**, and non-discrimination principles.
- Ability to work some flexible hours based on outreach schedules.

What We Offer

- Purpose-driven work within a supportive, multidisciplinary team.
- Ongoing training and supervision.
- A culture of safety, quality, and respect.

How to Apply

Send your **CV** (and optional short cover note) to contact@breathingtogetherlb.com with the subject line:

"MMU Nurse – [Your Name]".

Applications are reviewed on a rolling basis until the position is filled.
